Mumbai, India

Summary

Results-driven IT Leader and Full-Stack Developer with over 12 years of experience driving web architecture, network infrastructure, and technical strategy. Proven track record of scaling digital platforms, transitioning from hands-on frontend design to architecting full-stack applications with **React.js, Node.js, and MongoDB**. Adept at leading cross-functional IT operations, maintaining **100% infrastructure uptime**, and aligning engineering initiatives with core business objectives to fuel organizational growth.

Work Experience

Kairaliyude Kaakka, Navi Mumbai

OCT 2013 - MAR 2026

HEAD OF DEPARTMENT (IT)

OCT 2019 – MAR 2026

- Promoted to department head to oversee all technology operations, IT infrastructure, and digital platforms for a 10-person organization.
- Managed and maintained the company network infrastructure, ensuring 100% uptime, secure connectivity, and stable hardware setups for all team members.
- Spearheaded the continuous full-stack development and optimization of the "mumbaikaakka" website, aligning technical features with business goals.
- Directed end-to-end technical strategy, balancing day-to-day network troubleshooting with long-term web architecture updates.

FULL-STACK WEB DEVELOPER

JAN 2016 – OCT 2019

- Engineered and scaled the "mumbaikaakka" platform using React.js, Node.js, and MongoDB across the entire development lifecycle.
- Architected database schemas and built robust RESTful APIs to improve data processing speed and site reliability.
- Translated business requirements into functional software components, ensuring smooth integration between frontend and backend systems.
- Owned deployment pipelines and version control to maintain application stability during multi-year platform upgrades.

FRONTEND WEB DEVELOPER

OCT 2013 – JAN 2016

- Built and designed responsive, user-friendly webpages utilizing WordPress, HTML5, CSS3, and JavaScript.
- Created digital layouts and optimized graphic assets for the company magazine to ensure brand consistency.
- Collaborated with stakeholders to transform visual design mock-ups into cross-browser compatible code.
- Improved page load speed and user engagement by optimizing frontend code structure and media assets.
